Growing Tool-Suite: ConCatenator and SPiCE-Master Tool

2013-01-17 19:24

Smart Tool Support for Multi-Standard Assessments:

Using the new **SPiCE Master-Tool** together with the **ConCatenator** you can prepare a situation-specific questionnaire which enables you to perform an assessment which spans among several standards.

Save time and money: for example you can combine the requirements from ISO 15504, 20000 und 27000 in one big assessment/audit - doing it in one run - and so you don't need to evaluate your organisation in numerous separate meetings.
