

Consulting, Training & Services

Performance of Assessments

We will do the assessments for you: Starting with the preparation and doing all the things like briefings, interviews, records, analysis, evaluation and also the final assessment report. The topics our employees master cover the whole range of our [Assessment tools](#). Of course we can also offer you certified SPICE or CMMI assessors.

[Contact](#) us. We will be happy to place an offer.

Consulting for Software Engineering/Assessments:

- Training for the assessment methodologies (self assessment)
- Support for the assessment (guided business assessment)
- Comparison with other organisations (benchmarking)
- Development of company specific assessment tools (custom assessment)
- Development of company specific strategic management systems (ScoreCard)

Seminars and In-House Trainings:

Together with our partner [SynSpace](#) we offer seminars and trainings for the following topics:

- Effective Test-Management
-

Systematical Software-Testen

- Software Configuration, Build & Release Management

- Product- and Process Metrics
- Process Management with RUP
- Design Patterns (Entwurfsmuster)
- SPICE Assessor Training
- Web Software Testing
- Management of Large Projects

[Contact](#) us. We are looking forward to a conversation with you.

Products & Portfolio

Assessment Tools

We offer a wide range of Assessment Tools for different application domains, based upon proven assessment methodologies. Everything started with our self-assessment tool [SPiCE-Lite](#), which immediately reduced the effort for performing an assessment by 80%. In the mean while, international standards like SPICE have also the same structure, so now we can offer assessment tools compliant and compatible to ISO 15504 (e.g.: [SPICE121](#)).

Quest Tool Suite

The whole methodology for the performance of assessments with the tools is collected in this suite. With that the whole philosophy of continuous improvement can easily be adapted to the given framework and it is possible to let your own organisation or branche profit from the advantages of the assessment methodology. The Tool Suite contains tools like [SynEdit](#) and [SynEval](#).
