News and Updates

Update: Quest Tool Version 3.3.25

2022-01-30 21:49

SPiCE 1-2-1 for Automotive PAM 3.1 inkl. Cybersecurity and full VDA-Rules Coverage available now!

Assessment Software Update V3.3.25

New: **Cybersecurity PAM 1.0**

Additionally to HWE+MEC, the current version also includes the Automotive SPiCE for Cybersecurity PAM 1.0 in English and German. New processes are

- SEC.1 Cybersecurity requirments elicitation
- SEC.2 Cybersecurity Implementation
- SEC.3 Risk Treatment verifikation
- SEC.4 Risk Treatment validation
- MAN.7 Cybersecurity Risk Management
- ACQ.2 Supplier Request and Selection

Also HWE-PAM was updated to version 2.0 and MEC-PAM to version 1.8

New: **Full VDA Guidelines Coverage for Rules & Recommendations**

All relevant rules and recommendations (491!) from the VDA Automotive SPiCE Guidelines are now available in the assessment tool and can be commented and judget to be satisfied or not - additionally to an enhanced automatic check. Even for VDA-Rules which need additional information,

like sometimes refered to "above", this information
is provided.
Chapter 2.2 special environment rules can be
selected/deselected. Word-Reports contain the
detailed RuleCheckResult.

New: **Full DocList in Reports**

TheReports now contain the full DocList (Word and
Powerpoint).

For a complete list of all changes please read the changelog.

Beyond the usual assessment features, the assessor can switch between English and German during the
assessment.
