## Update: Quest Tool Version 3.3.4

2018-07-21 19:10

### Updated Assessment Software

### Updated Quest Tool Version

**The Quest Tool Version 3.3.4 is available for all Quest Tools released on July. 21<sup>st</sup>, 2018!**

All our available assessment tools (SPiCE, CMMI and others) have been updated!

Version 3.3.4 is 100% backward compatible to our previous releases, version 3.2.x and also to 3.0.3 (without Advanced Practices).

Starting with Software Version 3.3.0 there is a build-in Rule-Checker for the SPiCE 1-2-1 for Automotive PAM 3.1 tool conform to Blue-Gold-Volume - Automotive SPiCE Guidelines 1<sup>st</sup> Edition, which can trigger errors and warnings when you check the consistency of your ratings according to a guideline. All rules are checked, which are free of contextual information and rely only on the given PA/BP/GP rating.

A new feature 'nested' reporting templates' for Word allows to design complex reports with less effort.
