

# Products & Portfolio

## Assessment Tools

We offer a wide range of Assessment Tools for different application domains, based upon proven assessment methodologies. Everything started with our self-assessment tool [SPiCE-Lite](#), which immediately reduced the effort for performing an assessment by 80%. In the mean while, international standards like SPICE have also the same structure, so now we can offer assessment tools compliant and compatible to ISO 15504 (e.g.: [SPICE121](#)).

## Quest Tool Suite

The whole methodology for the performance of assessments with the tools is collected in this suite. With that the whole philosophy of continuous improvement can easily be adapted to the given framework and it is possible to let your own organisation or branche profit from the advantages of the assessment methodology. The Tool Suite contains tools like [SynEdit](#) and [SynEval](#).
